

Whole Brain® Thinking

Group workshops

STEP 1

An introduction to Whole Brain® Thinking

A group learning program built on the foundation of Whole Brain® Thinking, to introduce Whole Brain® concepts and how to apply them at work.

Learning Objectives

- Explore the art and science of the Whole Brain® Thinking Model.
- Receive and understand HBDI® Profile results.
- Explore the power of diverse thinking.

STEP 2

Select which areas you'd like to explore further

Communicating

- Bridge the communication gap and develop the skills to quickly connect, listen and understand, and be understood.

Teams

- Collaborate effectively, draw on the team's full diversity of thinking and apply Whole Brain® Thinking to improve team interactions and outcomes.

Problem Solving

- Build the thinking agility to define issues, partner effectively with others, and work through business problems more efficiently and productively.

Decision Making

- Develop the thinking agility to deconstruct complexity and make faster, objective and more effective decisions.

Customer Interactions

- Build the thinking agility to understand, plan for and adapt to a customer or prospect's thinking preferences to be more responsive to their needs.
